

Carrot Chantenay Royal

Description: This variety is near cylindrical in shape, is stump rooted, and has quite smooth skin. Coloration is a solid reddish orange. Its top has abundant growth reaching 15-20 inches, and a strong attachment. Average size is 6.5 inches by 2.5 inches.

Maturity: Approximately 100 days

Disease Tolerance: moderate tolerance to *Alternaria dauci*

Comments: Chantenay Royal is a heavy yielder. It is suitable for home gardens, and fresh market use.

Carrot GVS 10070 F1 hybrid

- Description:** Legend is an excellent imperator-type for early-main season. Impressive yields of smooth, uniform roots for cello snack pack type have been reported from California and other major production. Characteristics: uniformity, high pack out, sweet, firm, crisp flesh.
- Maturity:** Approximately 130 days, it is a mid-season variety.
- Disease Tolerance:** High tolerance to *Alternaria Dauci*.
- Comments:** Carrot GVS 10070 F1 Hybrid. Always considered an Imperator type. Jumbo/Cello snack pack types are basically Imperators. The classic cello is 8-9" long and 1-1 ¼" wide at the crown. The "jumbo" part just means that if you give the roots enough space and time they can bulk up, beyond classic cello proportions. Legend is on the jumbo end of the jumbo/cello spectrum. It probably averages an inch longer and a quarter inch wider than the leading cello types (Maverick).

Carrot Chantenay F1 Hybrid

Description: Chantenay F1 hybrid with a very strong foliage and a good bolting tolerance. The carrots are very bulky and productive. The average length is approximately 16-18 cm depending on the density and soil type. At the top the average diameter is 4-5 cm., and at the tip the 2-3 cm. Internally the color is dark orange, with a differences in color of the core and the flesh. The maturity in comparison with the O.P. Chantenay is a few day later what will not influence the potential in fresh market. Relatively high brix of 11 and a high level of Beta Carotene, on average.

Maturity: Approximately 130 days

Disease Tolerance: High tolerance to Alternaria Dauci

Comments: Chantenay F₁ Hybrid has very good color. This Chantenay Hybrid variety provides very high production. This variety is very good for fresh markets, and for the processing industry.
